Portfolio: [\(Live Azure Apps\)](#)

PROFESSIONAL SUMMARY

Senior full-stack engineer with 35+ years of experience architecting, building, and deploying production-grade applications across web, cloud, mobile, and desktop platforms. Expert in modern frontend and backend stacks (Angular, React, Blazor, .NET/C#, ASP.NET Core, JavaScript/TypeScript) with deep strength in cloud-native development, CI/CD automation, and multi-service architectures.

Skilled in API design, geospatial and mapping systems, Google Maps integrations, asynchronous programming, and high-performance UI state management. Known for delivering clean architecture, rapid problem-solving, and complete end-to-end solutions with minimal oversight.

TECHNICAL SKILLS

AI & LLM Development

OpenAI API integration (chat, embeddings, function calling, document Q&A), AI-powered application design, prompt engineering, vector search & semantic retrieval, hybrid .NET + AI architectures, secure token-based AI pipelines, document-extraction + LLM reasoning systems.

Frontend Development:

Angular, React, Blazor WebAssembly, HTML5, CSS3, Bootstrap, JavaScript, TypeScript, jQuery, AJAX, Razor Components, Google Maps JavaScript API, UI/UX state management, responsive layout engineering

Backend Development:

C#, ASP.NET MVC, ASP.NET Core, .NET Framework, Node.js, WCF, REST APIs, Entity Framework, Python (Flask), asynchronous programming, routing/mapping services, geospatial data handling, microservice-style API design

Databases:

MS SQL Server, Oracle, MySQL, SQLite, T-SQL, Stored Procedures, SSIS, SSRS, relational modeling, performance tuning, ETL workflows

Cloud & DevOps:

Azure App Service, Azure DevOps, GitHub Actions, CI/CD pipelines, Google Cloud Platform, IIS, Windows Server, deployment automation, environment configuration, release management, multi-remote Git workflows

Mobile & Desktop:

Xamarin Android, XAML, WinForms, WPF, PowerShell scripting, desktop automation

Tools & IDEs:

Visual Studio (2019–2022), VS Code, SSMS, Fiddler, Postman, Git, InstallShield, SAP Micros, OpenAI Playground, API debugging & profiling tools

PROFESSIONAL EXPERIENCE

TELUS – East PMO

Full Stack Developer / IT Project Manager 2

Network Engineering & Project Manager Office Operations

Calgary, AB

August 2022 – Present

- Solely designed, developed, and maintained full-stack applications using ASP.NET MVC and C#, delivering end-to-end functionality without external developer support.
- Led infrastructure migration to Google Cloud Platform, including OASIS system transition; developed PowerShell automation scripts to streamline the process.
- Developed and deployed TSQL stored procedures for robust data operations; integrated CI/CD pipelines via Azure DevOps.
- Built and maintained the Closing Activities application with VBS scripting for SAP integration; deployed on IIS10 and Windows Server 2019.
- Implemented responsive UI using Bootstrap, CSS3, and HTML5.

Tech: ASP.NET MVC, C#, JavaScript, jQuery, MS SQL, MySQL, SAP Micros, PowerShell, Bootstrap, CSS3, HTML5, GitHub, GCP, Azure DevOps, CI/CD, IIS10, Windows Server 2019, Node.js, VS2022 Copilot, OpenAI

JRD Consulting Inc.

Full Stack Developer – Angular, React, Blazor WebAssembly, Xamarin Android

British Commonwealth Air Training Plan (BCATP) – Military Mapping

Calgary, AB

May 2019 – Present

- Designed and delivered advanced interactive mapping systems using **Google Maps JavaScript API**, geospatial datasets, and custom UI components.
- Built **real-time simulation engines** including DeliverySim and SubwaySim, featuring multi-agent animation, routing logic, dwell-time modeling, and dynamic map rendering.
- Developed **Blazor WebAssembly** applications with C# → JavaScript interop, async pipelines, and high-performance UI state management.
- Implemented cloud-hosted routing services using **ASP.NET Core**, REST APIs, and Azure App Services.
- Refactored and migrated BCATP Canadian location maps; built interactive visualizations of historical and modern military bases, radar sites, and WWII training fields.
- Delivered responsive, cross-browser web apps using **Angular**, **React**, and **ASP.NET Core 5**; implemented full CRUD workflows for web and mobile.
- Built **Xamarin Android** apps using XAML, Google Maps, and SQLite; developed WinForms desktop tools using GMAP.NET.
- Established CI/CD pipelines and version control using **Azure DevOps**, **GitHub**, and **TFS**.

Tech: ASP.NET Core 5, Blazor WebAssembly, C#, Angular 10, React, TypeScript, Entity Framework, Google Maps API, JS Interop, Azure App Service, MSSQL, SQLite, Xamarin Android, XAML, WinForms, GMAP.Net, GitHub, Azure DevOps, TFS, Copilot, OpenAI

WiseTools Inc.**Full Stack Developer***INAuditPro – Smart Plant Instrumentation Inspection Tool for Oil Refineries*

Calgary, AB

Nov. 2017 – April 2019

- Solely developed INAuditPro, a web-based application for inspecting Engineering and As-Built Smart Plant Instrumentation databases for oil refineries and power plants.
- Engineered full-stack functionality using ASP.NET MVC, Razor, and C#; integrated SQLite, Oracle, and MSSQL database support.
- Delivered responsive UI using Bootstrap; packaged and deployed via Install Shield and IIS; ensured compatibility across Windows 7+ and Windows Server 2008–2016.
- Enabled data export and reporting via Microsoft Excel (2007+).

Tech: ASP.NET MVC, Razor, C#, Bootstrap, SQLite, Oracle, MSSQL, Install Shield, .NET Framework 4.x, IIS, Windows Server 2008–2016, Excel, GitHub

Virtual Health Solution – Client: EFW Diagnostic Clinics**Full Stack Developer***Medical Research & Patient Management*

Calgary, AB

April 2017 – October 2017

- Designed and delivered a comprehensive web-based booking and triage system for liver disease patients, integrated with a medical data registry for clinical research.
- Developed multi-tier architecture, stored procedures, triggers, and XML parsers; implemented responsive UI with Bootstrap and CSS3.
- Collaborated with clinical teams to align technical features with medical workflows.

Tech: ASP.NET, C#, JavaScript, jQuery, DevExpress, SQL Server 2012, XML, Bootstrap, CSS3, HTML5, TFS

City of Calgary**Senior Web Developer***ePermit – Online Residential Permit Servicing Platform*

Calgary, AB

February 2015 – June 2016

- Contributed to the ePermit platform, which received the 2016 CAMA Willis Award for Innovation for excellence in municipal service delivery.
- Delivered full-stack development for residential permitting workflows; designed responsive UI with Bootstrap and CSS; developed Oracle 10g-backed applications.
- Conducted unit/integration testing, managed version control via TFS, and participated in production deployment and post-implementation support.

Tech: ASP.NET, C#, JavaScript, jQuery, Oracle 10g, Bootstrap, Telerik, Active Reports, LINQ, WCF, IIS 7, TFS, Agile

Shaw Communications Inc.

Software Architect

Calgary, AB

Video Engineering – Interactive Systems (Shaw Direct & Shaw Cable) January 2008 – October 2010

- Independently developed tools and systems for monitoring and managing digital video services across Shaw Direct and Shaw Cable platforms.
- Built Gantt chart-based Schedule Editor UI, Scheduler, VSK Channel Editor, Content Online/Offline, and DSub Switching UI for Pay-Per-View and Star Choice divisions.
- Engineered an Olympics XML Ingest Tool to process Cable Labs templates from Rogers and CTV into Shaw's Asset Management system for Video on Demand.

Tech: C#, ASP.NET, ADO.NET, XML, TSQL, MS SQL Server, SSIS, SSRS, .NET Framework 4.0, SOA, Web Services, TFS, Agile/Scrum, Agile Unit testing

EARLIER EXPERIENCE (2010–2015)

- **Trans Canada Pipelines** (Jul 2014–Jan 2015) – SQL Programmer: Extracted/transformed SQL Server data to XML for SCADA system GUI; redesigned tools for extensibility and reliability.
- **Charity Check** (Aug 2013–Jun 2014) – Full Stack Developer: Full-stack development for charity verification platform using ASP.NET, Entity Framework, SQL Server, and Telerik components.
- **Walton Global Investments** (Nov 2012–Mar 2013) – Programmer: Updated TSQL stored procedures and SSRS reports for Salesforce integration; designed new reports to client specifications.
- **AGAT Laboratories** (May 2011–Sep 2012) – Full Stack Developer: Developed EUB FTP data transfer systems, XML extraction tools, Oracle/Excel automation, barcode scanning web app, and SSRS-based field data collection app.
- **JRD Consulting Inc.** (Oct 2010–May 2011) – Full Stack Developer : Enhanced inventory management software; upgraded Siksika Nation Housing Database from VB.NET to C#; migrated Access databases to SQL Server 2008 R2.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Computer Information Systems

DeVry Institute of Technology, Los Angeles, CA

Certificate in Visual Basic Programming

Southern Alberta Institute of Technology (SAIT), Calgary, AB
